# About Freakalytics and the author

Freakalytics, LLC was founded by Stephen McDaniel and Eileen McDaniel, Ph.D. Our mission is to cultivate a passion for analytics in our public training, custom training and consulting engagements. Our courses are designed around the principles of rapid analytics. Following these principles will help you explore your data, understand and interpret the data, communicate your findings and take action!

Co-founder Stephen McDaniel has 20 years of experience as a teacher, consultant, leader, innovator and author in the fields of business intelligence, data warehousing and data mining. As co-founder of Freakalytics, LLC and author of “**Rapid Graphs with Tableau Software**” and “**SAS for Dummies**”, Stephen is dedicated to helping people understand, present and take action with their data.

Stephen has worked with or been an invited instructor at many leading organizations:

- Netflix
- UC- Berkeley
- Tableau Software
- EBay
- State Farm
- Eli Lilly
- SAS
- The US Department of State
- Best Buy
- American Express
- Yahoo!
- Duke University
- The US Department of the Treasury
- Amgen
- Fidelity Investments
- Target
- Glaxo SmithKline
- Microsoft
- IMS Health
- Oracle
- Pfizer
- Boeing
- Loudcloud
- Brio Software

Our worldwide public training schedule is available at <http://www.Freakalytics.com/training> and our custom training and consulting information is available at <http://www.Freakalytics.com/consulting>. You can contact us at [Info@Freakalytics.com](mailto:Info@Freakalytics.com) or by phone at (206) 588-1678.

# Table of Contents

<b>Chapter 1</b>	<b>1</b>
<b>Tableau Software – rapid graphs to explore, understand, communicate and act!</b>	<b>1</b>
Power	2
Speed	4
Flexibility	6
Simplicity	7
Beauty	8
<b>Chapter 2</b>	<b>9</b>
<b>Build the core: Tableau basics</b>	<b>9</b>
Download, install and open Tableau	10
Connect to sample data and review the Tableau interface	12
Show Me Tableau in action!	15
Categorically clear views	20
<b>Chapter 3</b>	<b>25</b>
<b>Go with the flow: more Tableau basics</b>	<b>25</b>
When tables trump graphs	26
Insightful maps	29
View shifting- the underrated histogram and flexible bins	34
Exporting results to share your insights	39
<b>Chapter 4</b>	<b>41</b>
<b>Creating and managing Views to explore and inform</b>	<b>41</b>
Text Tables- an eye for detail	43
1. Text Table	43
2. Highlight Table	44
Heat Maps- how intense is it?	45
Bar Charts- five flavors to meet your needs	46
1. Aligned Bar	46
2. Stacked Bar	48
3. Side-by-Side Bar	49
4. Bar with Measure on Color	50
5. Histogram	51

**Chapter 5** \_\_\_\_\_ **53**

**Creating and managing advanced Views** \_\_\_\_\_ **53**

Line Charts- describe what happened recently	55
1. Line (Discrete)	55
2. Line (Continuous)	56
Scatter Plots- relationships matter	57
1. Circle	57
2. Scatter (Single)	58
3. Scatter (Matrix)	59
4. Dual Axis	62
Gantt Chart- understand the details over time	64
Pie Charts- by popular demand	65
Geographic Maps- where did it happen?	67

**Chapter 6** \_\_\_\_\_ **69**

**View structure, visual appearance, Summaries, Formatting and Titles** \_\_\_\_\_ **69**

Customizing Views from Columns, Rows, Pages and Filters Shelves	70
1. Columns	70
2. Rows	71
3. Pages	72
4. Filters	73
Enhance visual appeal with the Marks card	74
1. Text	75
2. Color	75
3. Size	75
4. Shape	75
5. Level of Detail	75
The Summary Card- rapid data insights	81
Headers and Axes	82
Titles, Captions, Field Labels and Legends	85
Formatting values in your Views	86

<b>Chapter 7</b>	<b>89</b>
<b>Organizing Views- Sorting, Filtering, Quick Calculations, Spotlighting and View Trending</b>	<b>89</b>
Simple and advanced Sorting of Views	90
Simple and advanced Filtering of Views	93
Aggregations for measures- specify the right summaries	95
Percentages provide balance to compare ratios	96
Quick Table Calculations	97
Spotlighting your View to call out important values	98
Totals and Subtotals to sum up parts of your View	100
Model your data with Trend Lines	102
<b>Chapter 8</b>	<b>107</b>
<b>Managing data is critical - Data Items and data management in Tableau</b>	<b>107</b>
Data items: names, types, roles, properties, and attributes	108
View Underlying Data- understand the detail behind the View	119
Dividing numeric data items into intervals using Bins	120
Grouping dimensions into categories	122
The power of Sets to combine and filter your View	124
<b>Chapter 9</b>	<b>127</b>
<b>Advanced data management in Tableau</b>	<b>127</b>
Calculated Fields- power to answer your difficult questions	128
Queries to retrieve the data you need	138
Extracts to accelerate your data exploration in Tableau	140
<b>Chapter 10</b>	<b>143</b>
<b>Sharing your insights from Tableau</b>	<b>143</b>
Exporting Images to other applications	144
Exporting Data to other applications and even back to Tableau	146
Publish as PDF- export your views to Adobe Acrobat format	149
Packaged Workbooks- take Tableau on the road!	150
Tableau Reader- share with your colleagues, friends and family	151
Tableau Server- powerful insights for everyone!	152
<b>Appendix - Timesaving Tips</b>	<b>153</b>

# Chapter 1

## Tableau Software – rapid graphs to explore, understand, communicate and act!

### **Power, speed, flexibility, simplicity and beauty**

These words come to mind when I reflect on Tableau Software. A picture is indeed worth a thousand words, so I will provide many examples to demonstrate why I am so enthusiastic about Tableau. Before diving into the examples, I would like to explain why I decided to write the first book on Tableau.

While there have been many applications over the past two decades that have attempted to simplify data exploration and analysis for a broad audience, only a handful achieved mild success. To be frank, most failed to deliver on this goal. I have personally used many of these products during my career. In fact, I have led software development and product strategy for some of these predecessor products. Unfortunately, many of the designs were based on the underlying technology, hindered by legacy systems, reliant on advanced analytic methods or designed around the technical database architecture. This ultimately led to overly complex products that excluded the vast majority of potential users and were cumbersome even for expert users. Even worse, many of these products actually impeded the ability of experts to easily share and explain findings with the broader audience.

Surprisingly, few applications have focused on how the typical person perceives images and thinks about information. **Tableau has addressed this head-on and changed the landscape forever.** Rooted in sound principles for clear information presentation and good graph design, you can use Tableau to rapidly explore, analyze and understand your data with easy to understand graphs and tables! Based on my experience, Tableau can help anyone who analyzes data in business, government or research to markedly increase their productivity. Even more impressive, people with limited exposure to data analysis can learn and use Tableau to improve their daily decision-making in a relatively short amount of time.

### **Power, speed, flexibility, simplicity and beauty**

This chapter will provide you with explanations and examples around each of these strengths. After reading this chapter, I hope you are inspired to take action and learn how to use this exciting application!

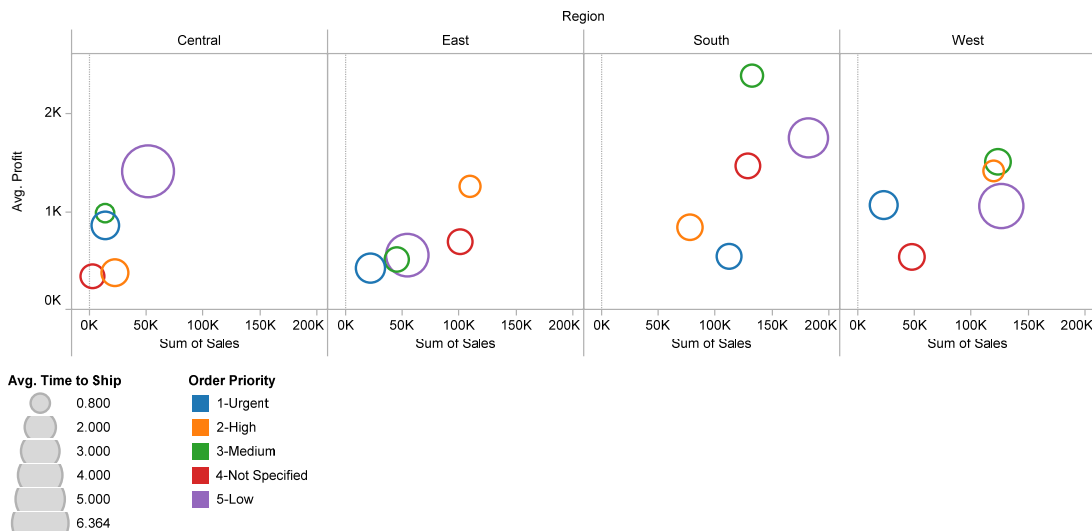

## Power

Whether you are exploring your data for new insights, answering specific questions or even deciding what questions to ask, Tableau gives you unprecedented control to investigate, communicate and take action with the information that is hiding in your data! Offering a broad palette of options to graph your data, intuitive means follow your thoughts by rapidly changing your view, powerful functionality to adjust your data metrics for relevant questions and many other capabilities to enable focusing on the relevant data - Tableau has it all. With Tableau, you can work with every major data source- from Excel workbooks to the largest databases. Tableau even enables extracting data from larger sources into a local “extract” file that will accelerate your data exploration and allow offline analysis when you are away from the office!

### Profit versus planned profit of major product lines by region (red is below plan and green is above plan)

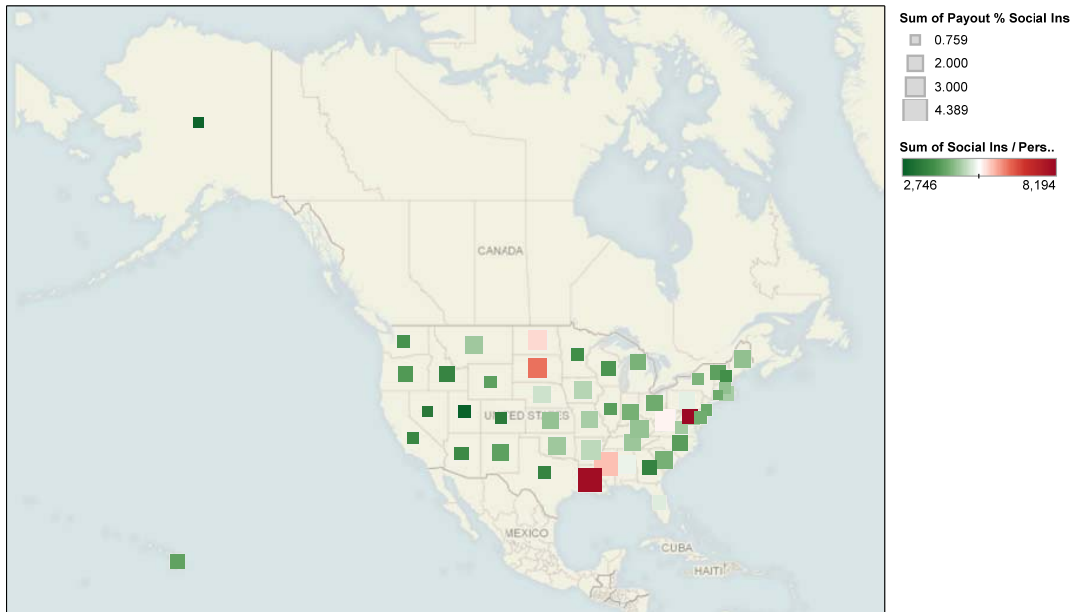

### Exploring average time to ship products (size of bubble) by priority (color of bubble) and region against total sales and average profit

### Exploring the relationship of sales and profit across every order

### Easily map your data- US government social insurance payout per person (color of square) and payout per person as a percent of amount paid into system (size of square) by state in 2006

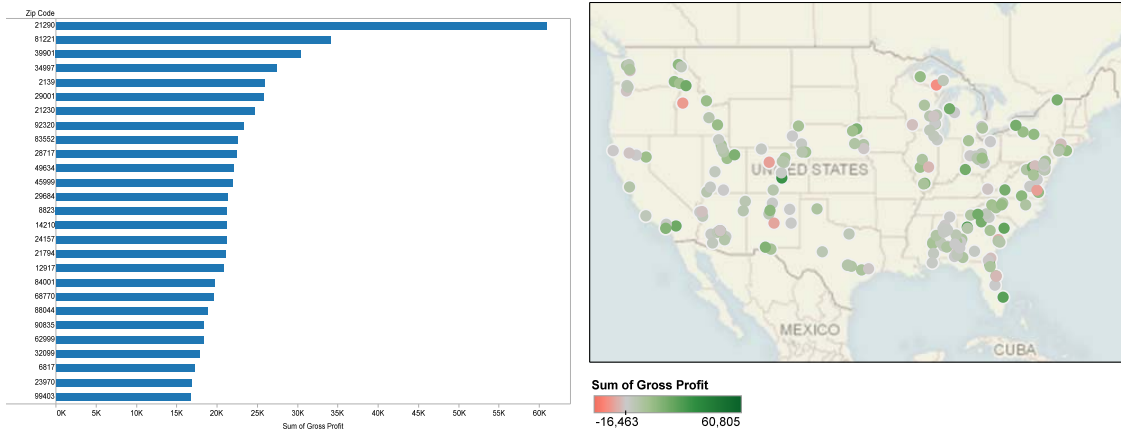

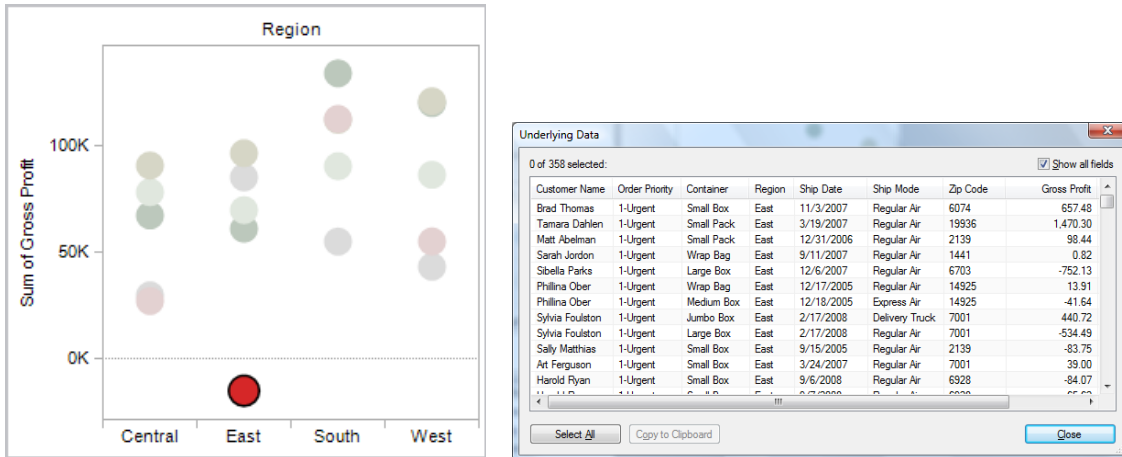

## Speed

Faster than you thought possible, you can build presentation quality graphs and tables in Tableau. You can have total control over creating the view or you can ask Tableau to generate the view based on the data that you select. From the view, you can rapidly sort, filter and group the displayed data- with just a few clicks of your mouse. **Each example demonstrates rapid changes made with Tableau in just a few seconds!**

### Gross profit data by Zip code – from bar chart to map with one click!

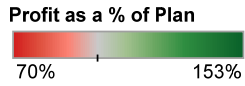

### Highlight a data point to examine the underlying data behind that value

Four views are better than one: From detailed table to color-highlighted table to side-by-side bar chart to color-encoded bar chart in under 30 seconds!

Market	Product	Sum of Profit								Sum of Profit vs Plan				
		2007				2008				2007				Q1
		Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	
Central	Columbian	843	928	915	793	1,271	1,311	1,287	1,177	-237	-252	-255	-267	191
	Lemon	582	719	677	574	879	1,016	952	854	-198	-181	-193	-176	99
	Decaf Espre..	950	945	874	840	1,432	1,337	1,235	1,246	-430	-365	-406	-790	52
	Darjeeling	1,050	1,155	1,220	970	1,583	1,630	1,722	1,439	20	35	70	80	553
	Chamomile	1,433	1,430	1,515	1,501	2,162	2,023	2,143	2,228	-137	-130	-105	-39	592
	Earl Grey	991	1,075	1,073	1,070	1,495	1,520	1,518	1,592	81	55	63	180	585
	Caffe Mocha	1,419	1,512	1,607	1,431	2,138	2,140	2,271	2,124	-511	-528	-583	-1,069	208
	Decaf Irish C..	908	1,045	1,089	889	1,370	1,476	1,536	1,322	-222	-275	-251	-291	240
	Mint	399	430	456	375	601	608	643	557	-21	-40	-34	-25	181
	Amaretto	457	500	556	567	689	705	788	842	-163	-110	-134	-163	69
East	Green Tea	77	87	130	205	117	122	184	305	-13	-3	-10	-5	27
	Columbian	2,461	2,940	3,298	2,430	3,714	4,150	4,656	3,607	-89	-110	-142	20	1,164
	Lemon	580	945	885	823	874	1,337	1,238	1,220	-40	45	55	193	254
	Decaf Espre..	240	248	257	237	363	351	363	352	-70	-92	-53	-113	53
	Darjeeling	645	676	710	618	973	957	1,002	919	-195	-184	-210	-182	133

Product Type	Date							
	2007				2008			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
Coffee	72%	74%	74%	70%	109%	104%	105%	104%
Espresso	79%	80%	79%	73%	119%	113%	112%	109%
Herbal Tea	85%	88%	87%	91%	128%	125%	122%	136%
Tea	95%	97%	96%	103%	143%	137%	136%	153%

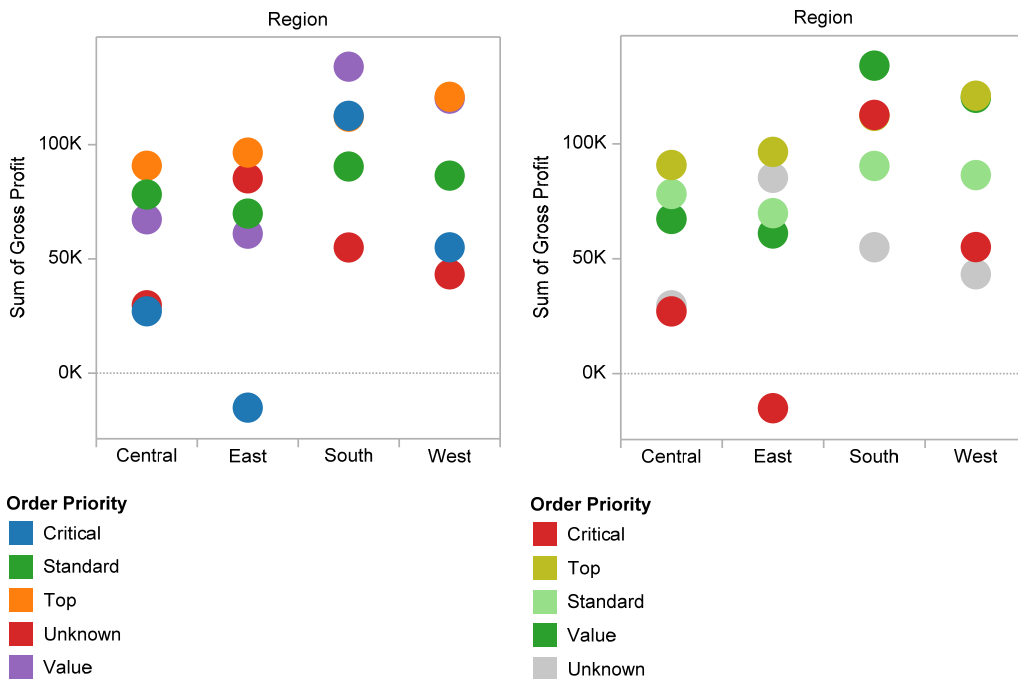

## Flexibility

You can easily change any part of your view to look exactly how you want, ranging from data point shapes and colors to clear data labels to intuitive color palettes to the way your metrics are calculated and compared. The days of thinking of your graphs as “good enough” are a relic of the past with Tableau!

## Create a new grouping of data by interacting with the view in just a few clicks

## Color code elements of the view for effective communication to your audience

## **Simplicity**

Getting started in Tableau is easy. In the first few weeks, you can learn the basics and begin mastering the techniques of graphical data exploration. Soon you will discover a rich set of powerful functionality to enable rapid completion of more complex visualizations. Those questions that you always wanted to investigate but thought were impossible can be explored with Tableau!

My experience with many other applications is that a typical application requires 2-4 weeks of steady use to learn and remember how to complete several moderately complex tasks. Achieving strong proficiency in many applications often requires months or even years. However, if you work with this book and Tableau steadily over 15 Days, I think you can easily achieve strong proficiency in the first few weeks. At that point, there is still an exciting journey of learning many techniques of graphical data exploration, understanding, and communication. At this point, the possibilities are nearly unlimited, as you will discover that Tableau is extremely intuitive and built to “stay out of your way”, so you can focus on your data more than on how to use the tools!

### **Areas of simplicity**

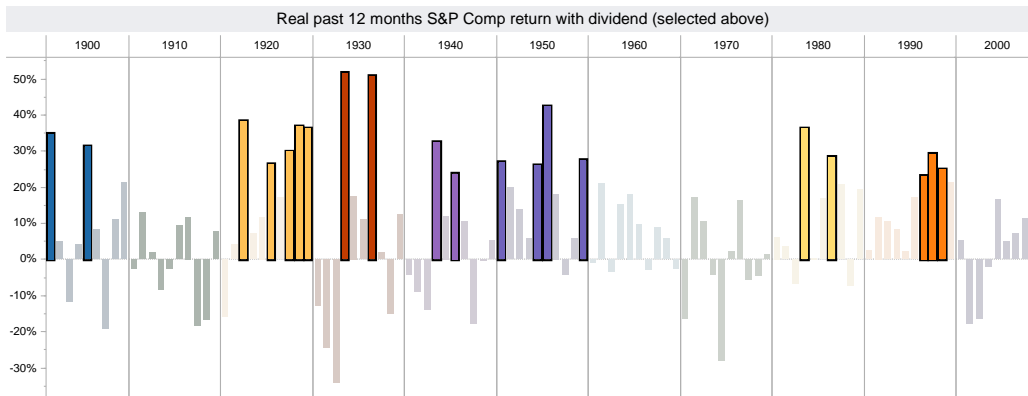

- **Direct interaction with graphs and data items to drag and drop what you want to see**
- **Sort the data automatically or manually directly from the view**
- **Simple and complex grouping of data categories from the view**
- **Easily exclude irrelevant data or include only the items of interest from the view**
- **Wide variety of automated calculations such as *change over prior year* or *year over year growth* without complex formulas**
- **Powerful array of advanced calculations for almost any need**
- **Quickly add subtotals and totals**
- **Readily explore the data underlying part of the view with one click**
- **Shift from other views to maps of the data with one click**
- **Easily export your work to other applications such as PowerPoint and Word**
- **Free Tableau Reader allows interactive functionality for those outside your team**
- **Publish your work to the web for wide consumption of results in your company; no installation of any kind is required for web users to have a rich subset of the desktop application functionality**

## Beauty

Create your own works of art while telling the story of your data in Tableau! Combining powerful insights with beautiful views all in one package will keep your audience engaged and informed during presentations. Tableau allows you to explore and understand the hidden value and patterns in your data. Tableau also encourages active use of good design principles, making it easy to impress others with effective, clear communications that lead to lively discussions and actionable results. The live dashboard below is available at <http://www.Freakalytics.com/p/4>.

### Tracking Economic Indicators and Stock Market Returns from 1901-2008; Relationships of Past, Present, and Future Values by Year

Select market metric to update bar chart:  
Real past 12 months return

Select a range of years (Click+drag), a decade, or specific years (<CTRL>-Click) to highlight data below.

Select values from any of the above distribution plots. Selected years show as blue and deselected as gray. You can Click+drag to select a continuous area or <CTRL>+Click to select multiple specific values. Values from only one metric can be selected at a time to highlight all of the other graphs. Deselect by clicking on the graph whitespace.
